

MAXAM has recently signed a strategic agreement with TTE- Europe, provider of software solutions and consulting firm with over 20 years of experience, specialized in tracking and traceability of explosives for civil use.

TTE- Europe is an associate company of Dresden Informatik and has been working together with several European organisations like EFEE as a specialized company, advising them technically.

TTE-Europe has developed a standard solution at European level for tracking and tracing of explosive materials from manufacturers to final customers, according to the basis of the identification of the EU directives.

Local partners network

What does the solution cover:

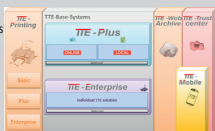

It's a professional solution, developed and in use. TTE has a European network of local support and in total of 17 partners. The network is still growing.

Application is displayed in local language of each country. TTE Solution solves easily the identification policy compliance, ensures unique identification of explosives in the EU by manufacturers and importers and guarantees a continuous and immediate registration of all required information.

Range of solutions:

TTE- Europe offers different solutions depending on the raised needs, which has allowed to create specific solutions and services to adapt to any type of client, depending on the segment:

- TTE PLUS ONLINE and LOCAL
- TTE Enterprise
- TTE Printing
- TTE Web Archive
- TTE Mobile
- TTE - Trustcenter

General TTE Solution graphic
